Data Sets and APIs

HCMC Neighborhoods Data

- List of districts and wards
  https://www.gso.gov.vn/dmhc2015/Default.aspx.
- Data file
  https://github.com/anhnhvn/first-github-repository/blob/master/HCMC_wards.csv

Google map API

Google Map API Geocoder to get the Latitude and Longitude of each area.

Foursquare API

Four-square API is the project's main data gathering source. This API enables users to perform location search, location sharing and details about a business.
